Key recovery is done in two ways, automatic or manual. With automatic recovery, Key Recovery recovers all the videos and pictures stored on your SD card directly and with ease. You just have to put your SD card in the software and a couple of minutes later, you will have recovered all your lost videos and pictures. With manual recovery, you will have the chance to scan your SD card and choose the pictures and videos that you want to recover. In addition, you will have the option to preview them and print them directly from the software. The software can be used by anyone without any previous knowledge of computer science and it is very easy to use. If you are looking for a solution that is easy to use and reliable, then Key Recovery is the software you need to use. Key Recovery was designed to recover pictures, videos and other important data in any SD card. Any file is recoverable using Key Recovery. There are three ways to use the software, Automatic, Quick Scan and Manual. How to Recover Videos? We have already told you that Key Recovery can recover any kind of files from your SD card. It doesn't matter if they are videos or pictures. The way you do this is by choosing a button at the top of the software and following the instructions. How to Recover Pictures? The process to recover pictures is quite simple. First of all, you have to choose the file type that you want to recover and then, you have to select the pictures that you want to recover. How to Recover Videos from Digital Camera? Using the camera recovery feature is just as easy as recovering videos and pictures from the SD card. If you have more than one video that you want to recover, just choose them and click the "Recover" button. Why should you use Key Recovery? Key Recovery uses a unique algorithm to scan your SD card and recover all the lost data that you want to recover. Key Recovery is easy to use, no registration is required and you can download the software and use it on any computer. You can use the software and recover your data without any problem. Key Recovery works even if you have lost your SD card. Key Recovery supports most of the file formats, including videos, pictures, audio, documents, and more. Key Recovery can recover even if the SD card was formatted. Key Recovery recovers all the photos and videos that you have stored on your SD card.
